Surgical Stapling From Blusail+ Surgical

Precision. Performance. Partnership.

Purple Surgical is proud to announce our strategic partnership with Bluesail, bringing a new era of surgical stapling innovation to the UK market.

This collaboration combines Purple Surgical's long-standing reputation for delivering high-quality, reliable surgical solutions with Bluesail's cutting-edge stapling technology and global expertise. Together, we are committed to offering surgeons and healthcare providers a comprehensive stapling range that delivers precision, consistency, and confidence in every procedure.

By uniting our strengths, we are setting a new benchmark for clinical performance and value.

This partnership not only expands access to advanced stapling solutions but also reinforces our shared mission to support healthcare professionals with products designed around safety, efficiency, and patient outcomes. With the Purple Surgical–Bluesail stapling range, UK hospitals can now benefit from world-class innovation, supported locally by a trusted partner who truly understands the unique needs of the NHS and private healthcare providers alike.

UltraElite Endoscopic Linear Cutter Articulating Reload Variable Height & SecureU Technology

- + Three different staple height in the same cartridge.
- + Stronger, streamlined fixed anvil, Improves manoeuvrability of stapler around target tissue, enhances clamping force.
- + Droplet staple groove anvil, enlarged staple groove is more conducive to B formation and more suitable for thick tissue, oriented and contact are increased by 30% to ensure a better staple formation, especially in thick tissue.
- + Provides new sterile Blade in every cartridge to prevent cross infection, improved cutting line with less jaggedness, wisping, tearing and acute tissue trauma and smooth tissue transection.
- + SecureU Technology, reduce the horizontal and longitudinal swing of staples when lifting, and ensure that staples can enter into the Groove safely and accurately during clamping and firing.

Bluesail+ Siderlux® Powered Articulating Endoscopic Linear Cutter Reload

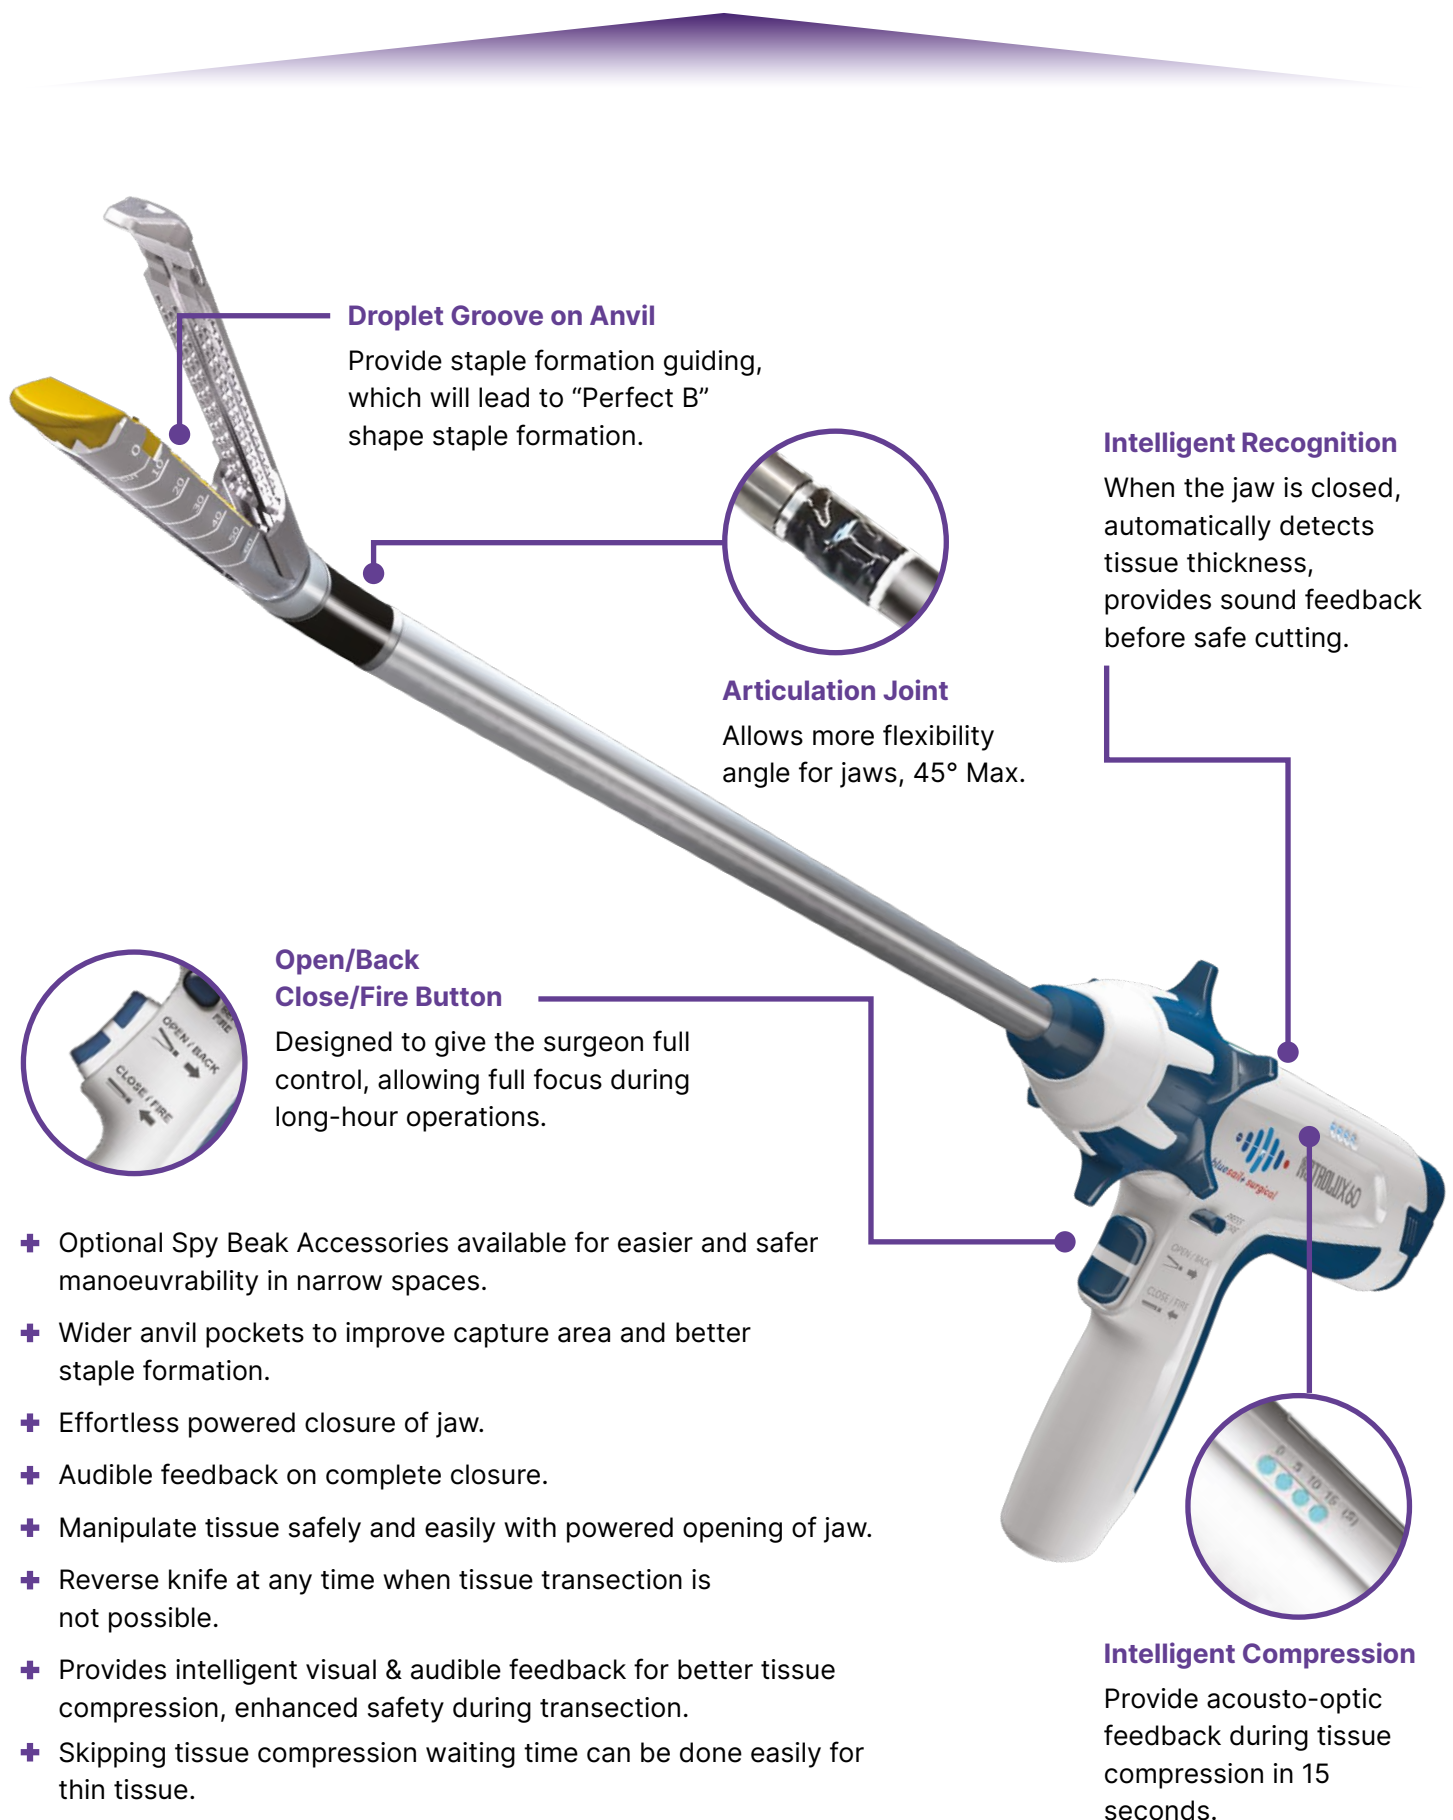

- ✦ Enhanced stability in firing for the entire cutting and stapling process.
- ✦ Greatly minimises movement of the distal tip, avoiding tissue pulling and protecting the anastomosis.
- ✦ Wider anvil pockets to improve capture area and better staple formation.
- ✦ Effortless powered closure of jaw.
- ✦ Audible feedback on complete closure.
- ✦ Manipulate tissue safely and easily with powered opening of jaw.
- ✦ Reverse knife at any time when tissue transection is not possible.

Bluesail+ Surgical Disposable Linear Cutter Staplers and Cartridges

+ Droplet Groove Design

Increase oriented contact area to ensure better B-shape staple formation.

+ CAM Design

Provide consistent formation from proximal to distal to reduce risk of staple line leakage.

+ Safety Lock-out Design

Prevent a used reload from being refired.

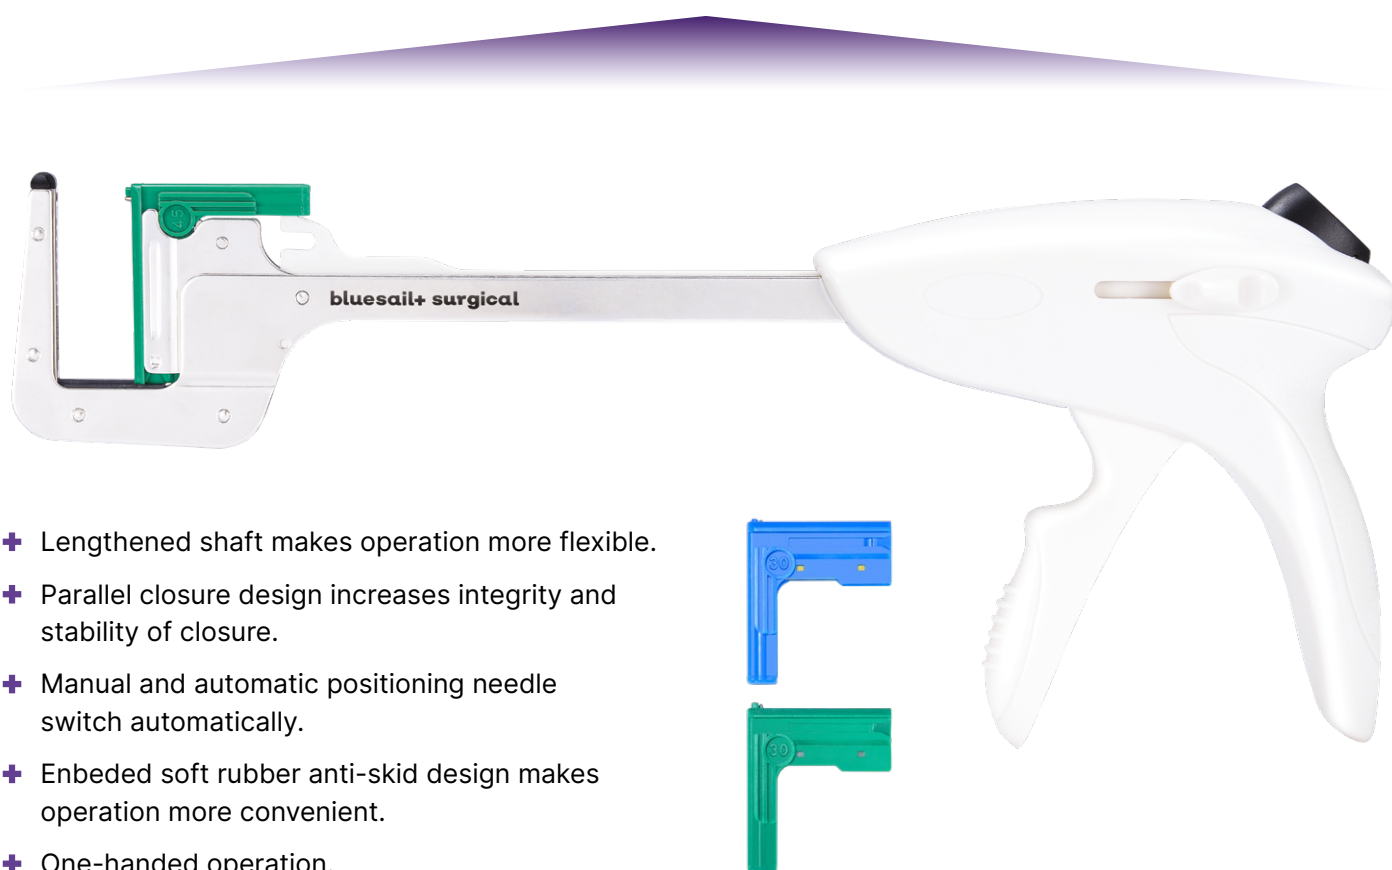

+ High Strength Staple

Use High strength titanium staple to get better formation.
